The coupling. It's the building block for growth.

A case seldom comes alone. The System Case never does.

Lots of space inside, lots of functions outside.

EVERYTHING IN PERFECT ORDER.

The new ORSY® System Cases are now available.

With ORSY, we are shaping the organizational principle of the future for you: Everything fits together, and all the parts fit inside one another. ORSY means order with a system. It's an idea, a principle. You could even say it's a philosophy. It's a totally new type of organization with a broad range of uses. It's a unique modular unit with a large number of connected components. All made to measure. Würth is reinventing ORSY and this journey begins with the System Case. Your organizational tool for day-to-day work developed by Würth, for you.

It goes anywhere, and everything fits inside.

Get in on the organizational system of the future, and let it boost your time, money and expertise. The ORSY system is practical, versatile and ideal for day-to-day use. Get started in the world of ORSY now! Innovation always means opportunity. Let this system help grow your business. We're right there with you - Close, closer, Würth.

The grid size ensures that all the elements of the ORSY system world are coordinated and compatible with one another.

In this world, everything fits together, and everything has its place: small parts, tools, machines and lots more.

The material? Tough as nails.

Everything under control and locked up tight.

Our product assortment policy: Always be flexible.

Anti-corrosive coating and welding primer with TITANID formula

Extremely hard micro-zinc flake coating with excellent anti-corrosive properties. Promax has an anti-corrosive agent that provides optimum protection from rusting for components with minor mechanical damage such as cracks and scratches. Thanks to the unique TITANID formula, the coating remains solid over the long term and resistant to weathering, and prevents white rust from forming. Coating welding seams, cutting edges and repair spots on bare and galvanised steel and steel sheeting.

ORSY® Shelving System

The ORSY® shelving system allows for the demand-oriented storage and provision of various commodities and consumables. Save space, time and costs with Würth's services: We take care of the planning, installation, labeling, stocking and materials planning for you.

ORSY[®]mat

The ORSY[®]mat vending and ordering system is a system solution offering many advantages: the availability of individually defined consumables can be guaranteed around the clock and the transparency resulting from the documentation of all orders placed by each employee will lead to considerably less consumption. The automatic ordering function provides additional supply security and helps reduce the workload.

Kanban

This solution comprises a multi-container system to supply bulk materials and items. The employees retrieve the items directly from the containers and return the containers to a collection point when they are empty. The returned containers are scanned, ordered and delivered again. All these service options can be provided by Würth. Würth supports its customers in the planning, installation, stocking and materials planning process for this time- and cost-saving solution.

Branch offices

With over 1,500 branch offices throughout the world, Würth is a professional partner for craftsmen.

E-commerce

E-business means more than just an online shop. Other digital ordering options, such as the Würth App, e-procurement or scanner-supported ordering systems are constantly being further developed, entirely in line with the customers' needs.
