CPS® KIT

Individual kits. Simply packed.

Service. Expertise and support.

We put together your assembly sets, repair sets and tool sets for you to form an individual kit.

The specifications, parts lists and packaging instructions for the individual components are linked with the kit in our ERP system.

We pack all of the following items to cater to your needs:

- DIN parts, standard parts and parts designed based on drawings
- Protective equipment
- Manual tools
- ...and much more!

Our status monitoring system ensures that the entire process is transparent, from the initial request through to delivery, and specific test plans are integrated to meet your quality requirements.

Performance. Individual solution concepts. CPS® KIT.

You can choose from our range of tried-and-tested packing solutions to select the optimum packaging for your individual kit:

- Polythene bag (sealable or clip bag)
- Cardboard box
- Tool cases/tool bags
- Small tote box
- Blister packaging
- Skin packaging

Depending on their suitability, the kits are either packaged manually or fully automatically with the help of our packaging machines.

Security. Quality from the outset.

We can customise your kit to suit your requirements by adding the following elements:

- Customer logo
- Different types of barcodes
- Traceable batch number
- Customer part number
- Customer name
- Insert sheet
- Printed items
- Labels

We are happy to work with you to find individual solutions that are specially tailored to your needs.
